diy.com

Easy and secure ordering **24 hours a day, 7 days a week**. Simply order using the 7 or 13 digit product code which can be found throughout the brochure next to the product price.

0870 0101 006

Telephone order lines are open from **8am to 8pm Monday - Saturday** and from **9am to 5pm on Sundays**. Please have the 7 or 13 digit product code handy. Calls are charged at the national rate.

in-store

Our stores are open from early morning to late evening Monday to Saturday with reduced hours on Sunday.

Items with this logo are available to take away in larger stores. If an item isn't in stock your local store will be able to get it for you.

Products with this logo are available to order for delivery direct to your home. See page 50 for details and charges.

HOW
TO...choose the **right fire**

The type of chimney (or flue) and the fuel supply you have available in your home will dictate the type of fire you can have. Use our fuel and chimney type selection grid below to identify what may be a suitable choice for you

Step 2.
Choose which type of fuel you have

Step 1.
Check which chimney or flue type you have

**Gas**

Create the warmth and reliability of a coal fire with gas. Clean, efficient and bringing instant heat to your home. High efficiency gas fires use the latest technology to provide greater efficiency. Look out for the green gas logo.

Must be installed by a gas safe registered engineer. For more info go to www.gassaferegister.co.uk

**Electric**

Electric fires allow you to bring the warmth of a flame effect to a room with or without heat. A clean and instant alternative. Just plug in and go!*

**Solid fuel**

Solid fuel, e.g. wood, coal etc, is an efficient and eco friendly solution that gives you the enjoyment of a real fire. Bring ambience and comfort to your home throughout the winter months. All solid fuel stoves must be fitted in accordance with current regulations. For a list of approved fitters contact HETAS www.hetas.co.uk / 0845 634 5626.

Brick or stone chimney (Class 1)

Commonly in older type properties, the Class 1 type of chimney rises above the rooftop usually with a traditional chimney pot. This type of chimney relies on the circulation of heated air through an internal chimney breast to the chimney above. You should ensure that your chimney is structurally sound before installing a new fireplace.

Multiflue or full depth inset**Flueless inset or wall hung** requires minimum room size & 100cm² ventilation**Any electric fire****Wall hung

about

mix & match...

With stoves and inset fires you can mix and match with our other products to complete your look
See page 6 to learn more

**Pre-fabricated flue†
 (Class 2)**

CLASS 2

This type can be identified by its metal flue pipe on the roof.

This type of flue creates the same circulation of heated air as a brick or stone chimney, although this will normally be through an internal false chimney breast built around a metal flue box.

Pre-cast flue

PRE CAST

Many modern houses often have a pre-cast type of flue which can usually be identified by either a raised ridge tile or metal flue pipe on the roof. This type of flue does not use a chimney breast either internally or externally. The flue tends to be shallow in depth so a slimmer fire is often required.

No chimney or flue

If you don't have a chimney or a flue you can choose any electric fire, or if you fancy a gas fire you can choose one of our flueless options. Flueless fires are more energy efficient than standard gas fires, converting a higher percentage of the energy input into heat output.

Multiflue or full depth inset

Step 3.
 Choose the type of fire you want

fuel cost calculator

(energy input x pence per kWh = running cost)

To calculate running costs, please multiply the energy input of the fire by your gas/electricity tariff*

† Some metal flue boxes are a wider 7" meaning you can have a Class 1 fire also.

* Running cost is calculated as pence per hour. These are likely to vary depending on your energy supplier, so please check with your supplier for current tariffs.

** If you are unsure about the suitability of a fire and your intended location for it, you wish to hardwire the product or you need further electrical work e.g. adding new sockets, we recommend you seek advice from a qualified electrician.

All fires in this brochure are primarily designed to provide top up heat and are not intended as a primary heat source.

CHOOSE
YOUR
OWN
STYLE

mix & match

Within this brochure we have a whole range of styles and designs to choose from, but if you still can't find one that suits your needs, why not mix and match individual products to create your own unique fireplace?

With a wide range of different fires, surround sets, surrounds, back panels and hearths to choose from the options are endless

surrounds

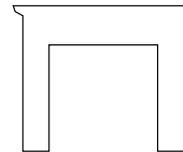

& surround sets

No matter what trends have inspired you, we are sure to have a fire surround that will help you achieve the look you want. We have surrounds made from **marble, stone and wood** in a range of finishes. Our surround sets are packages comprising a **surround, back panel and hearth as one product**. You will need to choose a suitable inset fire to complete your look

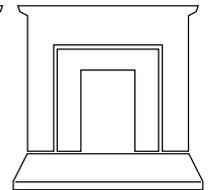

Fire surrounds*

- **wood veneer**
various designs available
- **solid wood**
luxury and warmth of natural wood
- **lightweight marble**
easy to install
- **marble, stone or granite**
luxury of real stone
- **cast iron**
for a period look

gas fires

If you like the look of a real flame then one of our stylish gas fires will be ideal. Choose from either a flueless wall hung contemporary fire (page 12), a more traditional inset fire (page 18) or a high efficiency inset gas fire (page 21) which you can mix and match with one of our surrounds, back panels and hearths (from page 60) to complete your look

Fuel type - gas

You will need a gas supply for a gas fire

Minimum room size

Flueless fires only, calculator on page 13

High efficiency gas fires

Converting at least 90% of the energy input to heat

Type of flue required - no flue

For fires that do not require a chimney or flue

Type of flue required - fan

A fan flue system vents through an exterior wall, page 23

Type of flue required - pre cast

See choose the right fire on pages 4-5

Type of flue required - class 1

See choose the right fire on pages 4-5

Type of flue required - class 2

See choose the right fire on pages 4-5

Control type - manual

Has a rotary control knob normally situated at the bottom of the fire, at the front, behind the decorative fret

Control type - remote

Has a separate remote control for ease of use

Control type - slide control

To avoid kneeling down to light the fire, these fires have a slide control at the top right corner for ease of use

Guarantee*

See product details for individual manufacturers' guarantees. This does not affect your legal rights

Gas safe

By law, anyone carrying out work on gas installations and appliances in your home must be on the Gas Safe Register

Shown here...

Finsbury full depth gas fire with President limestone surround set

All gas fires must be installed by a Gas Safe Registered installer. We have designed all our gas fires with the installer in mind so that installation, including future servicing, is made simple with minimal effort and disruption

about

flueless fires...

Flueless fires are a perfect no chimney solution to instant warmth, that simply hangs on the wall. They incorporate the latest in gas fire technology and do not need a chimney or flue to operate, combustion gases pass through a catalytic converter system.

To calculate running costs, please multiply the energy input of the fire by your gas/electricity tariff* (energy input x pence per kWh = running cost)

* Running cost is calculated as pence per hour. These are likely to vary depending on your energy supplier, so please check with your supplier for current tariffs.

90% OR MORE EFFICIENT

high efficiency inset

Glass fronted fires are 90% efficient, flueless variations are 100% efficient

how

does it work?

The glass front significantly reduces the warm air in your room being drawn up the chimney or flue. In addition to this, the convection air design draws in present cold room-air and circulates this through the hotbox to produce convected hot air back into the room. This increases performance and optimises efficiency.

Blenheim glass fronted fire

We're committed to making a difference

We are committed to making our business and the products we offer you increasingly sustainable and ethical.

We call this approach One Planet Home®.

Responsibly sourced wood products
diy.com/forestfriendly

- B&Q only buy responsibly sourced wood.
- We are against illegal logging.
- We've made it's easier to protect the world's forests.

If there is any wood or paper in a product, we require it to be traceable back to sources independently verified to be well-managed, meeting legal, social and environmental standards or is verified recycled.

Find out more email chainofcustody@b-and-q.co.uk

Start your One Planet Home®...

Log burners

By choosing to use responsibly sourced wood or making your own paper logs, you are opting for a more sustainable fire. Look in-store for alternatives to coal.

PAGE

electric fires

When gas is not an option or you prefer an alternative, the technology of an electric fire can still provide your home with the realistic flickering flames and glowing fuel beds found within a 'real' fire. You can now have a choice of either wall mounted fires (page 30), traditional inset fires (page 38), stoves (page 42) or a complete suite (page 44). The main benefit of an electric appliance is ease of installation. Without the need for a gas supply or a chimney, our range of electric fires simply require provision of a mains socket

Fuel type - electric

You will need an electrical point within reach of your appliance

Type of flue required - no flue

Electric fires do not require a chimney or flue

Control type - manual

The function controls are on the unit

Control type - remote

Has a separate remote control for ease of use

Control type - thermostatic

Thermostats switch heat on and off to maintain heat levels, reducing the overall heat output required during use, thus reducing the running costs

LCD

LCD technology is energy efficient due to lower energy consumption and it produces a more realistic artificial flame image

LED

LED bulbs consume less energy than conventional bulbs. Running the flame effect could cost as little as £1 a year**

Guarantee*

See product details for individual manufacturers' guarantees. This does not affect your legal rights

** 5W bulb (0.005kW) x energy tariff (12.6p (OFGEM - Electricity and gas supply market report 2010.)) x 4 hours x 365 days = 91.98p

complete electric suites

For a complete one box solution without the fuss of buying all the separate fireplace items, our complete electric suites range give stylish looks and great value

Fuel type - electric

You will need an electrical point within reach of your appliance

Type of flue required - no flue

Electric fires do not require a chimney or flue

Control type - manual

The function controls are on the unit

Control type - remote

Has a separate remote control for ease of use

Control type - thermostatic

Thermostats switch heat on and off to maintain heat levels, reducing the overall heat output required during use, thus reducing the running costs

LCD

LCD technology is energy efficient due to lower energy consumption and it produces a more realistic artificial flame image

LED

LED bulbs consume less energy than conventional bulbs. Running the flame effect could cost as little as £1 a year**

3 Year Guarantee*

See product details for individual manufacturers' guarantees. This does not affect your legal rights

surrounds & **surround sets**

Whatever has inspired your choice of fire, we are sure to have a fire surround that will enhance and complete your look. We have a range of different finishes - whether it is cool marble, limestone or granite, warm wooden surrounds or traditional cast surrounds

Within this section we have complete surround sets which comprise the surround, back panel and hearth - you can then choose a suitable inset fire to complete your look. Alternatively, if you prefer, choose a separate surround and then mix and match from our back panels and hearths section to make a truly unique fireplace

CLASS
1

Type of flue required - class 1

See choose the right fire on pages 4-5

Please note none of our surround sets are suitable for use with solid fuel fires.

about

marble & granite...

Nothing equals the natural beauty real stone has to offer, naturally formed to create a focal point to any room setting. Micro and Conglomerate marble is made from real marble crushed and bonded together to give consistency in both colour and finish. Not suitable for direct contact with solid fuel fires.

about reversible laminate & hearth trays...

Reversible laminates resist stains and scratches, are lightweight and easy to use. They can be used with all electric fires and most gas fires except glass fronted, balanced flue and flueless gas fires. Not suitable for solid fuel fires. The laminate hearth simply fits into a hearth tray, which provides a finishing edge to laminate hearths.

ways to pay

At B&Q you can pay by Visa, Mastercard, Switch, Delta and Maestro debit and credit cards.

Price promise

If you find any product even 1p cheaper somewhere else... we'll refund the difference and give you an extra 10% off the lower price.

We're so confident our prices in store are cheaper than our competitors, that if you buy a product from us and find the same product (or the equivalent in the case of B&Q Brand) available locally (within a 10 mile radius) for less – even if it's a sale or special offer price – we'll not just match that price but we'll beat the lower price by a further 10% for your trouble.

All we ask is that the lower price is generally available to any potential customer on the day that you call back, within 14 days of purchase, with a proof of purchase.

The product must be available to the general public. We do not Price Promise against:

Retail, Wholesale or Warehouse Clubs requiring membership, Internet or mail order companies, TradePoint and companies within the Kingfisher Group e.g. Screwfix, Services e.g. Installation, Delivery Charges and Chargeable Cutting Service, Staff Discount Card holders (including Group discount) can have a Price Promise or use their 20% Discount Card, not both.

TradePoint does not operate a price match policy with our competitors. (TradePoint prices are lower or level with B&Q).

Delivery

Available by home delivery

Items with this symbol are available to order for delivery direct to your home*. Delivery times vary depending on the product so please ask at the time of ordering.

Delivery from our specialist delivery team

Order Value ^{††}	Delivery charge
£0 - under £100	£5
£100 - under £200	£10
£200 - under £250	£15
Over £250	FREE

*Delivery charges apply. Delivery charges and availability may vary in Northern Ireland and offshore stores for some products marked for home delivery. Some items may only be available for collection from store and some items may not be available to purchase online. You will be advised at the time of placing your order.

†† Charges refer to the value of goods being delivered and exclude services.

Available from larger stores

Items with this symbol are available to take away in larger stores. If an item isn't in stock your local store will be able to get it for you.

Delivery from our store delivery team

Order Value ^{††}	Delivery charge
£0 - £250	£20
Over £250	FREE

Product detail

All products are subject to availability.

All specifications are correct at time of print.

Whilst we try to ensure accurate colour representation, please be aware that the photographic process may sometimes alter colours. Some items in our photographs are included for display purposes and are not necessarily intended to be installed as shown with regard to proximity. Please refer to the instructions supplied with your product before installation. A summary of this brochure is available in Braille, large print or on audio cassette. Please ask at your local store for details or email us at diversity@b-and-q.co.uk

At B&Q we have a number of different finance options to suit your needs which could help you fund your purchase.

To see how our finance products could help make your dream project more achievable, just visit your local store and ask a member of staff for details or visit diy.com

Credit subject to status.

The credit advertised is provided by one credit provider with whom we have a commercial relationship.

Our returns policy

Please keep your receipt for anything you buy from us. It will ensure we can help you, if you need to bring something back.

Terms and conditions

If you return a product unused, with the original receipt within 45 days of purchase (or delivery where applicable) we will exchange the product or issue a refund based on the original method of payment. For purchases made by debit/credit card, the same card must be used to process the refund. B&Q customer sales forms are an acceptable form of receipt.

Products that have been cut, made to measure or mixed to your requirements cannot be exchanged or refunded.

We reserve the right to refuse a return or to require proof of identity.

YOUR CONSUMER RIGHTS ARE NOT AFFECTED

If the product you purchase is faulty, or not as described, we may offer an exchange, refund or repair as appropriate, in accordance with your consumer rights.

You can return your items by:

In the first instance, **return via Home Delivery or www.diy.com**

- contact us on 0800 3895516. Lines are open 8am – 8pm Monday to Saturday and 10am – 4pm Sunday.

If calling from the Republic of Ireland please call 1800 946327

- e-mail us at home.delivery@b-and-q.co.uk

- write to us at B&Q Customer Services, Torrance House, Erskine Harbour, Erskine, Renfrewshire PA8 6PA

Alternatively, return the product to your local B&Q store

- you will need to take the product, your receipt/sales advice and the debit/credit card you used for payment with you
