B&Q

Bathrooms

Buying Guide

Friday 4th July – Thursday 11th September

Welcome...

This Bathroom Buying Guide works in conjunction with our B&Q Bathroom Ideas Book.

The Buying Guide gives you precise details about every bathroom product – choice, description, specification, price and availability. Combined with the inspirational Ideas Book you'll have everything you need to make the perfect choice for your bathroom.

If you do need any additional help, our trained in-store advisors will be happy to give you further advice.

Availability and delivery

Take home today ranges

Ranges featuring this symbol are available to take away (dependent on stock). Please check availability with your local store. Each store stocks a selection from our take away range. If an item is not in stock your local store will be able to order it for you.

Home delivery ranges

Ranges featuring this symbol can be delivered direct to your home. In addition to the IT take home today ranges we offer an extended collection of IT kitchens not found in store. Cooke & Lewis kitchens can only be ordered in-store for home delivery.

Our Banbury, Bedford, Burgess Hill, Bognor Regis, Consett, Eastleigh, Fareham, Hedge End, Nursling, Poole, Portsmouth, Port Glasgow and Sydenham stores stock a wide range of products – all available to take away. The symbol is used throughout this Buying Guide to indicate the products that these stores stock. However these are subject to availability and ranges may vary by store.

Orders over £250 are delivered FREE. Delivery times vary depending on the product so please ask at the time of ordering. Delivery charges are on page 120.

Can't get it home? Van hire from £14 per hour – see in store for details

What is water labelling?

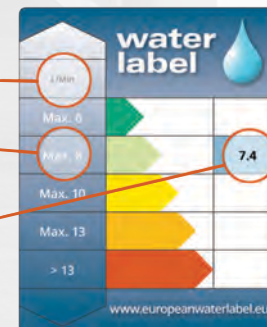

Water labelling is a new initiative led by the Bathroom Manufacturers Association designed to enable consumers make informed decisions regarding the water consumption of the products they purchase. B&Q is proud to be the first national UK retailer to embrace it.

The scheme is a symbol based method of determining how water efficient products are, very similar to the ratings on domestic appliances, and is used throughout Europe. For more information visit www.europeanwaterlabel.eu

Always lowering the cost

Our price promise

If you find any products even 1p cheaper somewhere else, we'll refund the difference and give you an extra 10% off the lower price. Take a look at page 135 for details.

Independently PRICE CHECKED

We're confident that our prices are consistently low every week. See the results for yourself at: kitchen-compare.com and bathroomcompare.com

Why pay more?

Lowering costs, never compromising on quality

This is at the heart of what we stand for... At B&Q we're able to offer you exceptional quality products and ranges at low prices. We offer fair and honest pricing that our customers can trust and unlike other companies, we'll never artificially inflate prices only to slash them later in the year to appear as a great money saving deal. This is simply dishonest and unfair on you.

10 year product guarantee

We're unlike other companies who's guarantees fall apart in the small print!

Built to last, for your peace of mind

We offer a 10 year guarantee on all of our kitchens and bathrooms. Our product teams take a great deal of time and care to research and source the very best ranges for us to put our B&Q name to. It's crucial that we bring you excellent quality and reliable products. We sell hundreds of thousands of kitchens, bedrooms and bathrooms to go into homes across the UK every year and have to make sure that what you buy from us is fit for purpose and of the highest possible quality.

We only choose the leading manufacturers who are best in class. They use high grade materials and carry out rigorous testing to British and European standards so we can offer them with confidence and with long guarantees.

Helping you with your project

Your step-by-step guide of what to expect...

The whole idea of the project may seem daunting but we're here to make it easy, and most importantly, enjoyable. We promise to do everything we can to ensure your project runs smoothly at every stage of the journey.

1. Inspiration

So what is it you're looking to do? Repair, refresh, maintain or get something totally new? We can inspire you with great ideas that suit you, your budget and your lifestyle. You may even need help with financing and installation which we will discuss with you.

2. Planning

Once inspired, we'll need you to get a few simple room measurements to help us move forward with your project. It's really simple and we'll give you guidance on how to measure, plan and make the best use of your space.

4. Create the look

You will now have a clear vision of your kitchen, bedroom or bathroom. You may want to look at how you can personalise your room and make it truly yours. Whether that's lighting, flooring, tiling, colour schemes or accessories, we have everything you'll need to create your desired look. We can even help you tile, lay flooring, paint and more so you don't have to.

3. Designing

With our totally free design consultation, we will bring your ideas to life with our leading 3D design software. We'll also need to look at heating, plumbing and electrics to see if they are affected by the project.

5. Budgeting

Following our survey, we will know exactly how much the project will cost you. But rest assured, our prices won't be beaten, and that's a promise. Check out our flexible finance options.

6. Installing

Your kitchen, bedroom or bathroom is ready to take its place in your home. Whether you've chosen to have it fully installed by our market leading installation service or just to have items delivered through our flexible delivery options, we'll make things easy and provide helpful advice at every stage. We can even help you with great tips to install yourself, either the full project or parts of it.

5 year installation guarantee

Professionally fitted

Deciding which kitchen, bedroom or bathroom is perfect for you is one thing, but we know that not everyone has the time or experience to install it themselves. We can take care of your project from installation to plumbing, electrics, gas works, flooring, plastering, tiling and joinery. With over 15 years of domestic installation experience, over 1/2 million completed projects and international accreditation, you're in safe hands, we're the most experienced national retailer in the UK.

All projects are managed locally so you'll always have somebody close by to contact if you need any help or advice. Once the work has been completed, and we've checked that you're happy, you will receive a 5 year workmanship guarantee; **the best of any national retailer in the UK today.**

Kitchens, bedrooms & bathrooms

Our installation service is audited and has best practice relationships with...

You're in safe hands

Helpful 'How to Measure' tips and advice for your bathroom

1

The overall room layout

- Sketch the outline of your room
- All you require is the general shape

2

Indicate openings – windows, doors, archways and hatched

- Mark the location of windows, doors, archways, hatches
- Include the opening swing of doors

3

Indicate any obstacles that can't be moved and include main services, electric, water and gas

- Indicate items that must be planned around
- Your boiler, meters, radiators, soil stack, stop cock, alcoves, etc
- Finally add main services, electric, water and gas

4

Measure between each fixed point – doors, walls and windows

- Pick a logical starting point like a corner and work clockwise around the room to avoid missing anything
- When measuring doors and windows remember to include frames and architrave, together with the distance from the floor to the underside of the windows

5

Measure obstacles in the room

- Your soil stack and boiler, radiators, etc
- Remember to include the width, depth and height of each item
- Show the obstacle heights and their distance from the floor in mm e.g. H=700mm F=1200mm

6

Measure main services, electric, water and gas

- Measure from the nearest fixed point on your diagram to the centre line of each service
- Include sockets, phone, gas, water and TV points
- When measuring larger service items such as consumer units, gas meters and radiators, remember to include their width and height from the floor

7

Measure ceiling heights

- Take two or three measurements to ensure the ceiling is consistent and mark the height in the middle of your survey plan
- If there are obstacles on the ceiling such as a stair slope or landing, mark this on your sketch

8

Example

Your sketch should look something like the example shown above. Now you're ready to start stage two of your project – Planning at B&Q

Helpful tips

- Remember walls aren't always perfectly square, so measure them at the top, middle and bottom.
- Bear in mind that switches, sockets and most radiators can be moved – you can discuss this with your B&Q designer.
- If you're keeping any freestanding appliances or furniture like tables and chairs, include their dimensions for your design consultation.
- Take photos of any particular feature or bits you're unsure about.
- Include for discussion any structural alterations you may want to make like moving doors.
- Once you've finished, double check your measurements for accuracy as this will make it easier to create your new project.

Water using label for toilets

How does it work? Research was carried out to find the typical flushing pattern for the average household. This information was used to set the criteria for the Water Label. The Water Label for toilets gives an average flush value which is based on 3 short flushes and 1 full flush added together and then divided by 4 to give the average flush volume. The lower the figure the more efficient the toilet.

A big plan for a small planet

One Planet Home is all about doing it right. It's our commitment to source products ethically and sustainably and offer you a greener choice.

We are reducing B&Q's impact by reducing carbon emissions, reducing waste and safeguarding natural resources and environments. You can make greener choices for your home too, look out for our recommended 'greener' products and advice about small green steps that can make a big difference.

To see the full One Planet Home plan and how we are implementing it, please visit:

Our extensive range of more than 50 different baths offers all the latest looks and finishes to fit your style and budget. Amongst them are the traditional steel, advanced acrylic and the revolutionary Supercast.

3 simple steps to choosing the right bath

Step 1 what's your style?

Consider space, functionality and style. With a straight bath choose single or double ended, and a width and depth to suit you. Showerbaths have dual use and are wider at one end. Corner baths provide generous bathing space and practicality. Freestanding baths ooze indulgence - some can be set against a wall if space is tight.

Step 2 a material choice

Acrylic or steel? Acrylic baths are lightweight and are reinforced to ensure that they're strong. They retain heat well and remain warm to touch. Steel baths are robust and hard-wearing. Our freestanding baths are double skinned acrylic for greater heat retention.

Step 3 tips on taps etc...

Consider whether your choice of bath has tap holes, and how many: you can now choose your taps accordingly. Check to see which type of waste is recommended and consider our bath panels for that finishing touch. If choosing a freestanding bath, remember to consider feet and stand pipes

What is water labelling?

Water labelling is a new initiative led by the Bathroom Manufacturers Association designed to enable consumers to make informed decisions regarding the water consumption of the products they purchase. B&Q is proud to be the first national UK retailer to embrace it.

The scheme is a symbol based method of determining how water efficient products are, very similar to the ratings on domestic appliances, and is used throughout Europe. For more information visit www.europeanwaterlabel.eu

Water using label for baths

How does it work?

When calculating the water usage of a bath, the Water Label shows the Actual Capacity* of the bath but research has shown that only 40% of the actual capacity needs to be filled with water to have a satisfactory bath. You can make taking a bath more efficient by reducing the level you fill your bath to.

* For baths with overflows the Actual Capacity is to the point at which the water starts to flow out of the overflow. For bath without overflows the Actual Capacity is to a point 80mm below the point where the bath will start to spill over.

Some useful things to know...

Home spa options

Many of our baths can be factory-fitted with a whirlpool or AirSpa system – just look out for these symbols.

Like the idea of a cast iron bath? Let us introduce Supercast – the modern day equivalent

Supercast is a substantial reinforcement process applied to an acrylic bath. Not only does it make it incredibly strong and hard-wearing, it also results in much better insulation which keeps the water hotter for longer – which is good for the environment.

So you get all the traditional benefits of cast iron, combined with the latest benefits of acrylic – high gloss finish cast all the way through the material, easy to clean and much lighter. And it's all covered with a whopping 30 year manufacturer's guarantee.

HOW TO
CHOOSE
YOUR

bath screen

Turn your bath into a shower enclosure – just add a screen! We've got many ingenious designs, from shower columns and slim panel splash guards for use with shower curtains, to models that fully enclose the showering area over your bath.

3 simple steps to choosing the right bath screen

Step 1

think about accessibility

We've got screens that pivot outwards 90 degrees (some pivot inwards too) for easy access or fold back in sections against the wall to save space and make the room feel bigger too. Or maybe you'd prefer the fully enclosed effect achieved with our sliding or front and side screen combinations.

Step 2

consider size and thickness

Choose from a huge selection of screen sizes, 950mm will maximise splash control. Glass thicknesses vary too from 3mm up to 8mm on our highest quality screens – see symbols. All are made from toughened safety glass and most are reversible to fit either end of the bath too.

Step 3

choose your finishing touches

There are frame and glass finish options to suit every décor from totally clear and frameless to white or polished silver frames and pearl, frosted and even patterned glass. Look out for screens with built-in towel rails or handy shelving – and some feature an anti-calc easy-clean coating too.

Some useful things to know...

Look out for:

How it opens – in, out, pivot, sliding or folding

Glass thickness – from 3–8mm, all are toughened safety glass

Available to order in-store for delivery to store

The following stores – Banbury, Bedford, Burgess Hill, Bognor Regis, Consett, Eastleigh, Fareham, Hedge End, Nursling, Poole, Portsmouth, Port Glasgow and Sydenham have a reduced selection of our extensive kitchen range.

HOW TO
CHOOSE
YOUR

bathroom taps

One of the most extensive collections you'll find, from world renowned names like Grohe and Bristan to our exclusive Cooke & Lewis brand. Some have matching showers and accessories too.

3 simple steps to choosing the right taps

Step 1 which water pressure?

You need to check if you have a high or low pressure water system and choose your tap accordingly. Please refer to our easy water pressure guide.

Step 2 which style?

Whether you are looking for something traditional or contemporary, we have a wide range of bathroom taps and mixers to suit your style and budget.

Step 3 which function?

From shower mixers and bath fillers to bath and basin taps, we have a range of different designs to suit all baths and basins. Many of our taps also have matching showers and accessories.

Some of our more modern mixer tap designs have ceramic disc technology.

some useful things to know...

Pressure

All taps marked LP are suitable for both low and high pressure water systems. Taps marked HP are only suitable for high pressure systems.

Don't know your pressure? Pick up a handy tester.

Ceramic disc technology

Turn on and off and mix hot and cold by easy up and down or side to side movements. Here's a quick guide;

Tilt up and down

Single twist ¼ or ½ turn action

WRAS & KIWA

Most of our taps are either WRAS or KIWA approved. See diy.com for full details.

TMV Taps

TMV (thermostatic mixer valve) taps protect against scalding. They automatically control the water temperature and cut the flow if it rises too high. TMV2 taps are specifically designed, built and tested for use in the home. TMV3 taps are certified for use in the high risk healthcare sector.

What they're made of

All our taps have solid brass bodies plated with a durable chrome finish.

Ricci – Top mount basin mixer

LP (0.1 bar) 5052931306077 £62

Available in selected stores only

– INNOVATION –
TOP MOUNT INSTALLATION

- Efficient: One person only for installation.
- Simple : No need to bend under the basin.
- Fast : Less than 5 minutes.

- 

Step 1: Install the base. Secure the base to the basin.
- 

Step 2: Drop in the flexible hoses. Position the arrows to ensure they are aligned.
- 

Step 3: Turn to fit the body on to the base.
- 

Step 4: Fix the screw to secure and it is done!

above are compatible
for use with our stand pipes.
Centre distance between pipes is 150mm

We offer a superb selection of enclosures perfectly crafted to showcase the Cooke & Lewis hallmarks of quality and design. The result is a collection of shower enclosures that are as single minded in quality as they are diverse in style. There is no need to choose between aesthetics and functionality because with Cooke & Lewis you can have it all.

3 simple steps to choosing the right shower enclosure

Step 1 style

Consider the look you're after – within the three families there is something to suit every individual taste and décor. Eclipse: Make a real design statement – a virtually frameless style featuring stunning industrial design features such as exposed rollers, ultra low profile trays and clear and smoked glass options. Cascata: Frameless and contemporary style in the widest choice of shapes and sizes with ultra low profile tray* and clear and smoked glass options. Deluvio: Our simple, no fuss range featuring high lustre aluminium frames, frameless doors and low profile tray.

Step 2 shape and size

Think about the shape and size that will best fit your layout. With ten different shape options from the conventional square to the more adventurous circular or P-shaped there's sure to be one that fits like a glove. Tight for space? Our collection starts at just 760 x 760mm for the smallest of spaces and also offers a whole host of other space saving options including models with bi-fold, sliding and corner entry doors that don't open out into the room. If you're replacing a bath our Cascata 1700 x 900mm might fit perfectly in its place.

Step 3 trays and easy plumb kits

All enclosures in the Cooke & Lewis collection have a bespoke tray that comes complete with the waste. The enclosures allow for a minimum of 20mm nominal adjustment for out of true walls. The Eclipse and Cascata feature an ultra low profile tray‡ that's just 27mm high and Deluvio features a low profile tray that's 45mm. Depending on your particular installation you may need to use the special easy plumb kit to raise the tray, making levelling simple and allowing easy access to the waste underneath.

*The Cascata walk-in enclosure is designed for use with the low profile, not the ultra low profile tray

‡Eclipse and Cascata enclosures must be screwed in to the shower tray. We strongly recommend that you purchase the bespoke tray detailed with each enclosure

Rectangular shower enclosure

It's easy to get this look with our Aquadry range of base kits and screens. They're the most advanced of their kind; made from engineered structural foam with a premium technology reinforced cement based finish, they have been used in health clubs, spas and hotels for years.

3 simple steps to choosing the right wetroom

Step 1 level or raised access?

Creating a complete 'wetroom' with the waste inset into the level floor, gives the sleekest finish and the easiest access, but you need to recess the shower tray and waste plumbing underneath your floor. Or you can create a 'wetzone' where the shower area sits on top of the floor like a standard shower tray and is tiled over.

Step 2 size matters

The Aquadry kits, extensions and wetroom screens come in a range of shapes and sizes that can be used in a variety of ways, giving you lots of flexibility to create a shower area that's right for you. Choose your kit and screen separately. Remember that all Aquadry kits are simple to cut, so they can be used in any size or shape of bathroom.

Step 3 which screen?

You can choose just a front screen if fitting wall to wall. Otherwise, side screens are also available. All screens are made from toughened safety glass.

We recommend you choose:
A 700mm screen for a finished tray length of 1250 – 1450mm.

A 900mm or larger screen for a finished tray length of 1450 – 1850mm.

some useful things to know...

What is Aquadry?

Aquadry kits make a tiled floor waterproof. Without the kit, water would seep through the grout. Each kit includes a foam base, all tapes, adhesives, sealers and the waste.

Concrete floor

Aquadry kits are suitable for use with concrete floors. The 150mm kit gives plenty of room for plumbing to be hidden underneath.

Underfloor heating

Aquadry kits work brilliantly with electric underfloor heating but aren't suitable for wet systems.

Glass thickness

Look out for this symbol which indicates the glass thickness, from 6-8mm. All are toughened safety glass. We recommend the E-cloth shower cleaning pack, which will keep your glass looking good as new

Choosing tiles

Mosaic tiles are the best and easiest to work with in a wetroom installation, as they don't need to be cut to the fall of the tray. Stone mosaics work particularly well due to their increased slip resistance.

Home delivery

All our wetrooms are available for home delivery. You can find the full details of the home delivery service at www.diy.com/delivery

Splashwall panels are a practical alternative to bathroom tiles. They are durable, hygienic, simple to clean, plus there is no need for grouting! They are easy to install and can be fitted over most surfaces even existing old tiling. Splashwall panels are made with a high pressure laminate face and back with a medite core.

How it works

Splashwall is a quick, easy and stylish alternative to tiling that's perfect for showers and bathrooms.

- **Easy to fit** – available in a choice of individual panels and ready-to-go kits that can easily be cut to suit your space and application
- **No special tiling or grouting skills required**
- **Available in a wide choice of colours and finishes**
- **Low maintenance** – no grouting to discolour or attract mould
- **Easy to clean** – just use warm soapy water and a soft cloth

What you'll need

Choose either individual panels or 2 or 3-sided panel kits to suit your project. Kits include everything you'll need to fit your splashwall. Finishing extrusions can also be purchased separately – see page 70.

Splashwall Individual panels

Panels are 2420h x 1200w x 11mm thick
Panels are manufactured to a very high standard utilising some of the latest adhesive technologies and bonding processes

Splashwall 2 panel kits

Our ready-to-go kit consists of 2 panels, 1 internal corner, 2 end caps, 2 tubes adhesive, 2 tubes of white silicone, 1 splash seal kit, 1 cleaning cloth and fitting instructions

Splashwall 3 panel kits

Our ready-to-go kit consists of 3 panels, 2 internal corners, 2 end caps, 2 tubes adhesive, 2 tubes of white silicone, 1 splash seal kit, 1 cleaning cloth and fitting instructions

Extrusions

The finish of the extrusions in each kit varies to complement the selected design – Satin anodised, Polished silver effect, Black or White

don't

forget...

When buying single panels you will also need adhesive, silicone and a cleaning kit. See in-store or diy.com for details.

Understanding your... water pressure

Is your water low or high pressure?

Low pressure

Gravity fed

This is the most common in the UK. You've got a cold water tank in your loft and a hot water cylinder in your airing cupboard. The greater the distance between the bottom of the cold tank and the top of the shower head, the better your water pressure will be for your shower.

You can choose from:

Mixer, electric or power

High pressure

Combi boiler / unvented system

Combi boiler:

Usually (but not always) installed on the wall in your kitchen.

Unvented system:

You've got a different kind of hot water tank with an expansion vessel on top of it, usually in your airing cupboard (or somewhere similar).

You can choose from:

Mixer or electric showers.

Power showers

- Ideal for homes with low pressure systems
- Contains an integral pump to boost the flow of water
- Mixes hot water from your cylinder with cold water
- Select the temperature you want by turning a dial
- Installation requires plumbing and electrical connections
- Suitable for low pressure systems only

Electric showers

- Economic and easy to install
- Choose from our selection of designs to create the perfect look
- Connects to your cold water supply only and heats it using a built-in heater
- Select the temperature you want by turning a dial
- Installation requires plumbing and electrical connections
- Mains fed

Mixer showers

- Economic and easy to install
- Choose from our selection of designs to create the perfect look
- Mixes hot water from your boiler or cylinder with cold water
- Select the temperature you want by turning a lever or dial
- Each shower has a pressure performance symbol
- Installation requires plumbing connections

Energy saving showers

- Economic and easy to install
- Choose from our selection of designs to create the perfect look

HOW TO
CHOOSE
YOURshower **controls**

All the leading brands and all the latest technology - our shower controls range offers every type to suit your water system and every style to suit your bathroom décor.

3 simple steps to choosing the right shower

**Step 1****which water pressure?**

The type of shower that will work best in your home largely depends on the type of hot water system you have and whether it's low or high pressure. If you're not sure, see opposite.

**Step 2****which style?**

There are four different types – electric, mixer, power and digital. See page 170 for the key features and benefits of each.

**Step 3****which function?**

Our range features the latest technology and most are now thermostatic, so no more fluctuating temperatures! Would you like a ceiling mounted shower? Or two showerheads (handy for hair washing)?

some useful things to know...

Shower performance (flow rate)

Look out for these symbols with each shower. They tell you the typical flow rate you can expect from the overhead shower at low or high pressure.

2.0 L/min
LOW PRESSURE
Flow rate (litres/min) at low pressure

8.0 L/min
HIGH PRESSURE
Flow rate (litres/min) at high pressure

Installation guide

When replacing an electric shower, you may want to reduce the installation work by replacing with a shower that has the same cable and water entry positions. This will ensure that your new electric shower is compatible. These points are demonstrated by the example diagram.

- ➔ Cable entry
- ➔ Water entry
- ● Rear entry point

**Guarantees**

Many of our showers come with 3 year and 5 year guarantees.

**What is water labelling?**

Water labelling is a new initiative led by the Bathroom Manufacturers Association designed to enable consumers make informed decisions regarding the water consumption of the products they purchase. B&Q is

proud to be the first national UK retailer to embrace it.

The scheme is a symbol based method of determining how water efficient products are, very similar to the ratings on domestic appliances, and is used throughout Europe. For more information visit www.europeanwaterlabel.eu

Water using label for electric showers**How does it work?**

Electric showers by nature of their design are economic users of energy and water. For this reason they carry the 'Recommended' water label.

▲ Our Banbury, Bedford, Burgess Hill, Bognor Regis, Consett, Eastleigh, Fareham, Hedge End, Nursling, Poole, Portsmouth, Port Glasgow and Sydenham stores stock a wide range of products – all available to take away. The symbol is used throughout this Buying Guide to indicate the products that these stores stock. However these are subject to availability and ranges may vary by store.

ENHANCE
YOUR
SHOWER

shower pumps

shower pumps

Boost your shower flow by up to four times with one of our shower pumps – great for low pressure gravity systems

HOW
TO...

choose a shower pump

A 'regenerative' shower pump is ideal for situations where the cold water tank is just over a metre above the pump or when the plumbing route to and from the pump is complicated by many bends and elbows.

A 'centrifugal' shower pump features a differently shaped impeller to the 'regenerative' pump which spins faster and produces a higher flow of water. The cold water tank needs to be at least two metres above the pump and any plumbing to and from it should have as few bends and elbows as possible.

Both types are fitted with long life carbon graphite and high density ceramic seals and are supplied with stainless steel flexible connecting hoses.

Please note: for both 'regenerative' and 'centrifugal' pumps, the highest point of the pipework or the shower head must be 250mm below the cold water storage tank.

What is 'water pressure' and how to know if yours is high enough

Water pressure is the force of water (measured in 'bar') in a pipe and governs the flow of water through it. Before buying taps or showers check your water pressure as some are suitable for high and some for low pressure. Sometimes this is determined by the type of water system you have (see 'showers guide' pages 169–170).

Water pressure varies across the UK – it can also vary in your home so check the pressure coming out of your shower or taps separately. It's easy with a B&Q water pressure testing kit (½ inch water pressure test kit 3733134) or ask a plumber to check it for you.

bathroom furniture

Whatever style you want and whatever the size and shape of your bathroom, we're confident that we have the perfect furniture solution for you. If you're the creative type then get designing with our fitted furniture range which offers you the maximum amount of flexibility. The only limit is your imagination! If you'd prefer help with the design or would like advice on styles, then simply make an appointment to see one of our design consultants in-store and they will do that part for you. For a quick and easy refresh why not choose from one of our co-ordinated furniture collections. Whether wall hung or freestanding, traditional or contemporary, there is something in every style to suit your taste.

3 simple steps to choosing the right bathroom furniture

Step 1

Identify your space/requirements

When choosing bathroom furniture, take a look at how much space you have available and also what you want to use it for as this will affect what type of furniture you buy.

Step 2

choose from our fitted or freestanding furniture collections

Fitted furniture gives you the flexibility to create a more individual storage solution, tailored to your bathroom and the space you have available.

Or if your bathroom would be better suited to a few key pieces that you can rearrange as and whenever you fancy a change, then why not go for freestanding.

Step 3

choose your style

Do you lean towards the traditional or do you prefer things more modern? Whatever you're into, B&Q's range of bathroom furniture has something to suit every taste.

The wood in our bathroom furniture is responsibly sourced from sustainable forests.

MIX AND
MATCH TO
GET THE LOOK
YOU WANT

fitted bathroom furniture

COOKE™
& LEWIS

Fitted furniture is the perfect choice if you want to create a bathroom storage solution that's totally unique to you. Just mix and match to get the look and layout you want.

Which look is for you?

Fitted

Add plinth, cornice and pelmet to your cabinets to create the made-to-measure, fully fitted look. Works with all our door styles.

wall hung

Fit cabinets to the wall for the latest 'floating in mid air' look. A great choice for contemporary door styles.

Step 1

Choose your cabinets

▲ Our Banbury, Bedford, Burgess Hill, Bognor Regis, Consett, Eastleigh, Fareham, Hedge End, Nursling, Poole, Portsmouth, Port Glasgow and Sydenham stores stock a wide range of products – all available to take away. The symbol is used throughout this Buying Guide to indicate the products that these stores stock. However these are subject to availability and ranges may vary by store.

ways to pay

At B&Q you can pay by Visa, Mastercard, Switch, Delta and Maestro debit and credit cards.

Price promise

If you find any product even 1p cheaper somewhere else... we'll refund the difference and give you an extra 10% off the lower price.

We're so confident our prices in store are cheaper than our competitors, that if you buy a product from us and find the same product (or the equivalent in the case of B&Q Brand) available locally (within a 10 mile radius) for less – even if it's a sale or special offer price – we'll not just match that price but we'll beat the lower price by a further 10% for your trouble.

All we ask is that the lower price is generally available to any potential customer on the day that you call back, within 14 days of purchase, with a proof of purchase.

The product must be available to the general public. We do not Price Promise against: Retail, Wholesale or Warehouse Clubs requiring membership, Internet or mail order companies, TradePoint and companies within the Kingfisher Group e.g. Screwfix, Services e.g. Installation, Delivery Charges and Chargeable Cutting Service, Staff Discount Card holders (including Group discount) can have a Price Promise or use their 20% Discount Card, not both. TradePoint does not operate a price match policy with our competitors. (TradePoint prices are lower or level with B&Q).

Delivery

Available by home delivery

Items with this logo are available to order for delivery direct to your home*. Delivery times vary depending on the product so please ask at the time of ordering.

Delivery from our specialist delivery team

Order Value††	Delivery charge
£0 - under £100	£5
£100 - under £200	£10
£200 - under £250	£15
Over £250	FREE

Goods ordered online at diy.com

A £5 flat rate delivery fee applies to all home delivery orders placed on diy.com. This applies to all items, including those available for next day delivery.

*All guarantees are manufacturers guarantees. This does not affect your legal rights.

Products with this logo are available to take home today from all of our stores (dependent on stock).

Our Banbury, Bedford, Burgess Hill, Bognor Regis, Consett, Eastleigh, Fareham, Hedge End, Nursling, Poole, Portsmouth, Port Glasgow and Sydenham stores stock a wide range of products – all available to take away. The symbol is used throughout this Buying Guide to indicate the products that these stores stock. However these are subject to availability and ranges may vary by store.

Delivery from our store delivery team

Order Value††	Delivery charge
£0 - £250	£20
Over £250	FREE

*Delivery charges apply. Delivery charges and availability may vary in Northern Ireland and offshore stores for some products marked for home delivery. Some items may only be available for collection from store and some items may not be available to purchase online. You will be advised at the time of placing your order.

†† Charges refer to the value of goods being delivered and exclude services.

Product detail

All products are subject to availability. All specifications are correct at time of print. Whilst we try to ensure accurate colour representation, please be aware that the photographic process may sometimes alter colours. Some items in our photographs are included for display purposes and are not necessarily intended to be installed as shown with regard to proximity. Please refer to the instructions supplied with your product before installation. A summary of this price guide is available in Braille, large print or on audio cassette. Please ask at your local store for details or email us at diversity@b-and-q.co.uk

At B&Q we have a number of different finance options to suit your needs which could help you fund your purchase.

To see how our finance products could help make your dream project more achievable, just visit your local store and ask a member of staff for details or visit diy.com

Credit subject to status.

B&Q acts as a credit broker. The credit advertised is provided by Hitachi Capital Consumer Finance with whom we have a commercial relationship.

Our returns policy

Please keep your receipt for anything you buy from us. It will ensure we can help you, if you need to bring something back.

Terms and conditions

If you return a product unused, with the original receipt within 45 days of purchase (or delivery where applicable) we will exchange the product or issue a refund based on the original method of payment. For purchases made by debit/credit card, the same card must be used to process the refund. B&Q customer sales forms are an acceptable form of receipt.

Products that have been cut, made to measure or mixed to your requirements cannot be exchanged or refunded.

We reserve the right to refuse a return or to require proof of identity.

YOUR CONSUMER RIGHTS ARE NOT AFFECTED

If the product you purchase is faulty, or not as described, we may offer an exchange, refund or repair as appropriate, in accordance with your consumer rights.

You can return your items by:

In the first instance, return via Home Delivery or www.diy.com

■ contact us on 0800 3895516.

Lines are open 8am – 8pm
Monday to Saturday and
10am – 4pm Sunday.

If calling from the Republic of Ireland please call 1800 946327

■ e-mail us at home.delivery@b-and-q.co.uk

■ write to us at B&Q Customer Services, Torrance House, Erskine Harbour, Erskine, Renfrewshire PA8 6PA

Alternatively, return the product to your local B&Q store

■ you will need to take the product, your receipt/sales advice and the debit/credit card you used for payment with you
